# the seven CHAKRAS

Kundalini is the most powerful, Divine energy dormant in us, resting at the base of the vertebral column. When the Kundalini is awakened thru Yogic practices, it passes from the base of the spine to the crown of the head thru subtle energy vortices called 'Chakras', sublimating the individual consciousness in Universal Consciousness. The Chakras are a pathway to Self-discovery involving optimization of our physical, mental, emotional and spiritual capabilities and well-being. They are situated in a subtle channel of energy called Sushumna along the vertebral column, coincide with the body's endocrine system and connect our physical, energetic, mental, intellectual and spiritual levels of existence. When Chakras vibrate optimally, health prevails; when they are blocked, ill-health manifests. The diagram shows the seven main Chakras in the body, their location, seed vibrations, glands and organs influenced by them as well as different tools to balance them.
